**1. Design and develop an application system that when the user clicks the Command button 1, the message "Command button 1 clicked!" will be displayed at the Text box. When the user clicks the Command button 2, the message "Command button 2 clicked!" will be displayed at the Text box, and "Command button 3 clicked!" will be displayed when the user clicks the Command button 3. Follow the given figure below in designing and developing the application system.**

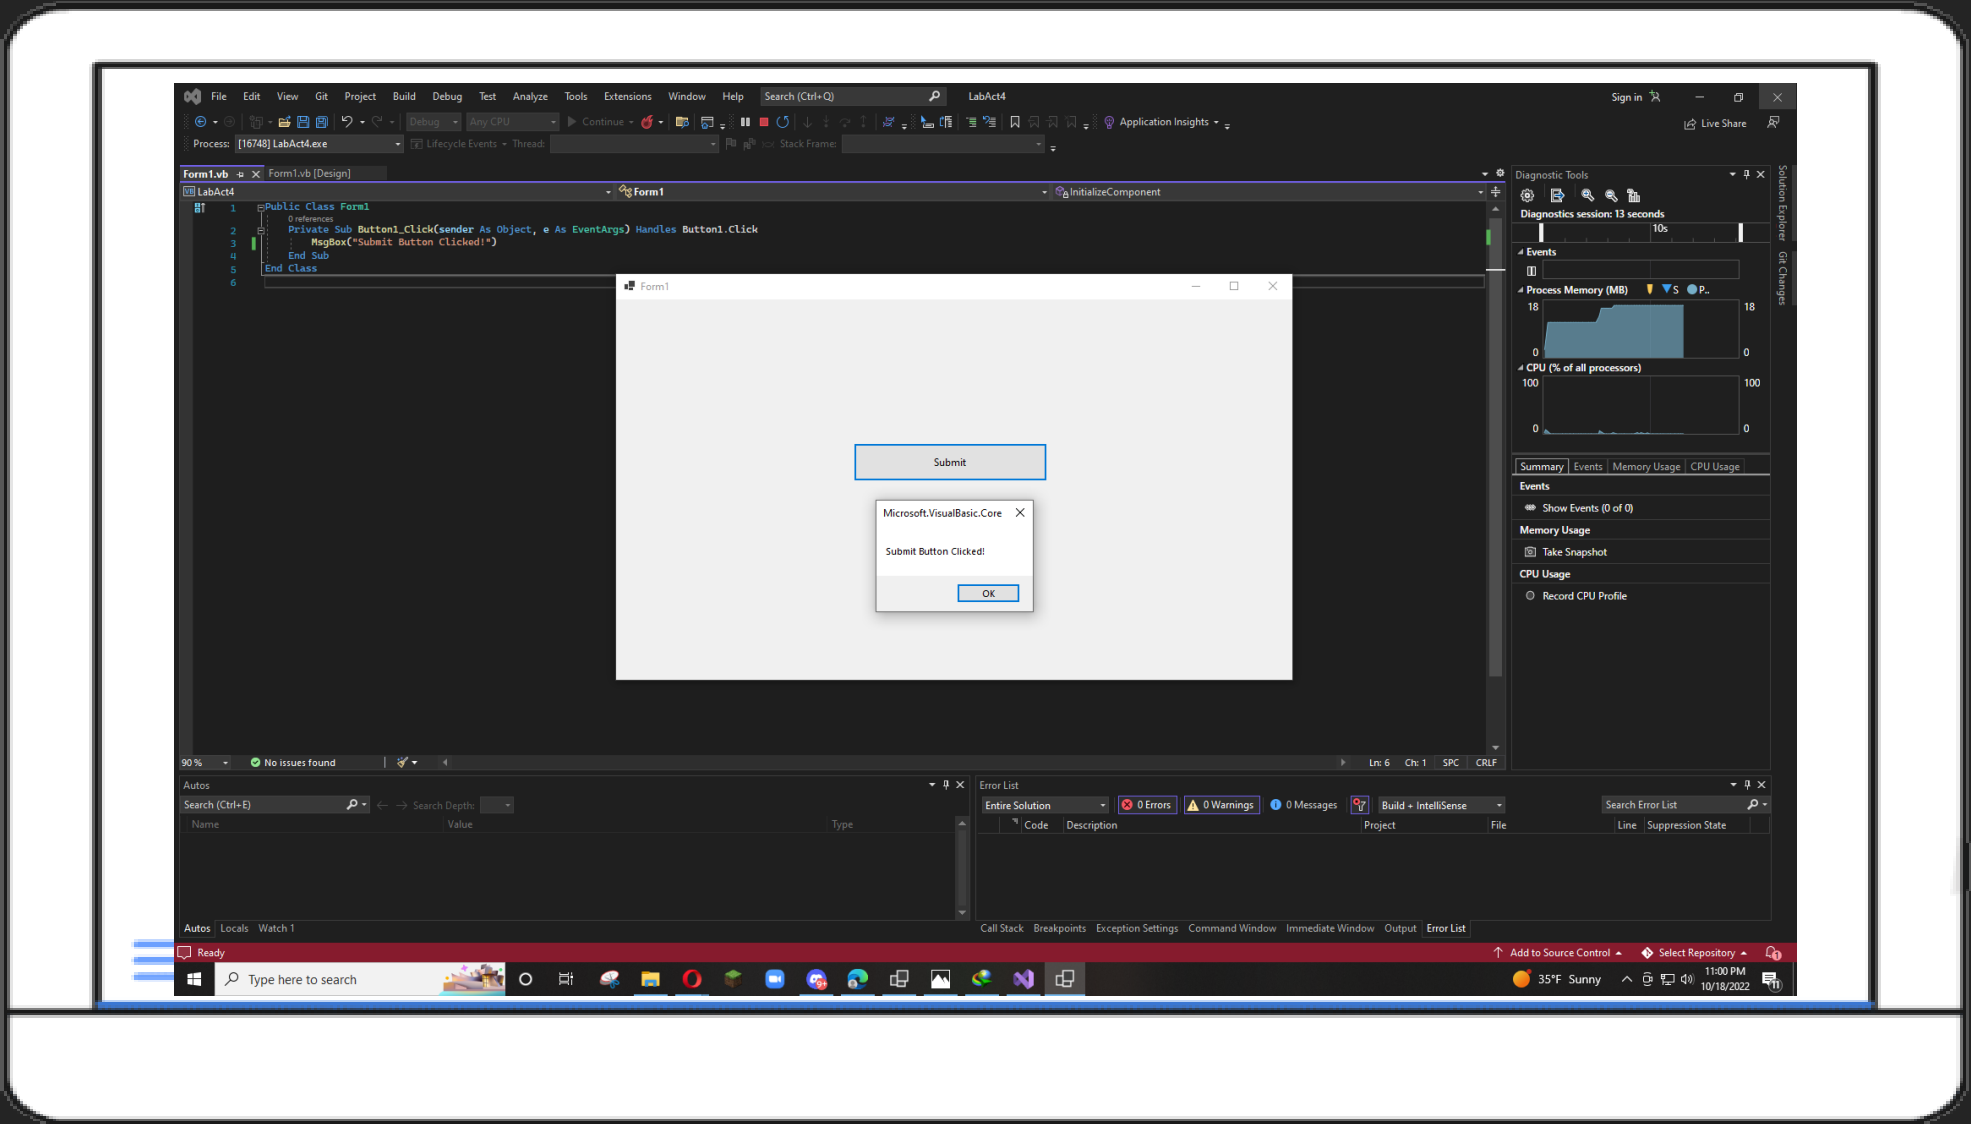

```vbnet
Public Class Form1
    Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
        TextBox1.Text = "You have chose RED"
        PictureBox1.Image = Image.FromFile("C:\Users\paroc\Pictures\Red_Color.jpg")

    End Sub

    Private Sub TextBox1_TextChanged(sender As Object, e As EventArgs) Handles TextBox1.TextChanged

    End Sub

    Private Sub Button3_Click(sender As Object, e As EventArgs) Handles Button3.Click
        TextBox1.Text = "You have chose BLUE"
        PictureBox1.Image = Image.FromFile("C:\Users\paroc\Pictures\blue0517-4dfc85cb0200460ab717b101ac07888f.jpg")
    End Sub

    Private Sub Button2_Click(sender As Object, e As EventArgs) Handles Button2.Click
        TextBox1.Text = "You have chose GREEN"
        PictureBox1.Image = Image.FromFile("C:\Users\paroc\Pictures\grass-green-color-solid-background-1920x1080.png")
    End Sub

    Private Sub PictureBox1_Click(sender As Object, e As EventArgs) Handles PictureBox1.Click

    End Sub
End Class
```

2. Design and develop an application system that when the user clicks the Command button 1, the message "Command button 1 clicked!" will be displayed at the Text box 1. When the user clicks the Command button 2, the message "Command button 2 clicked!" will be displayed at the Text box 2. Follow the given figure below in designing and developing the application system.
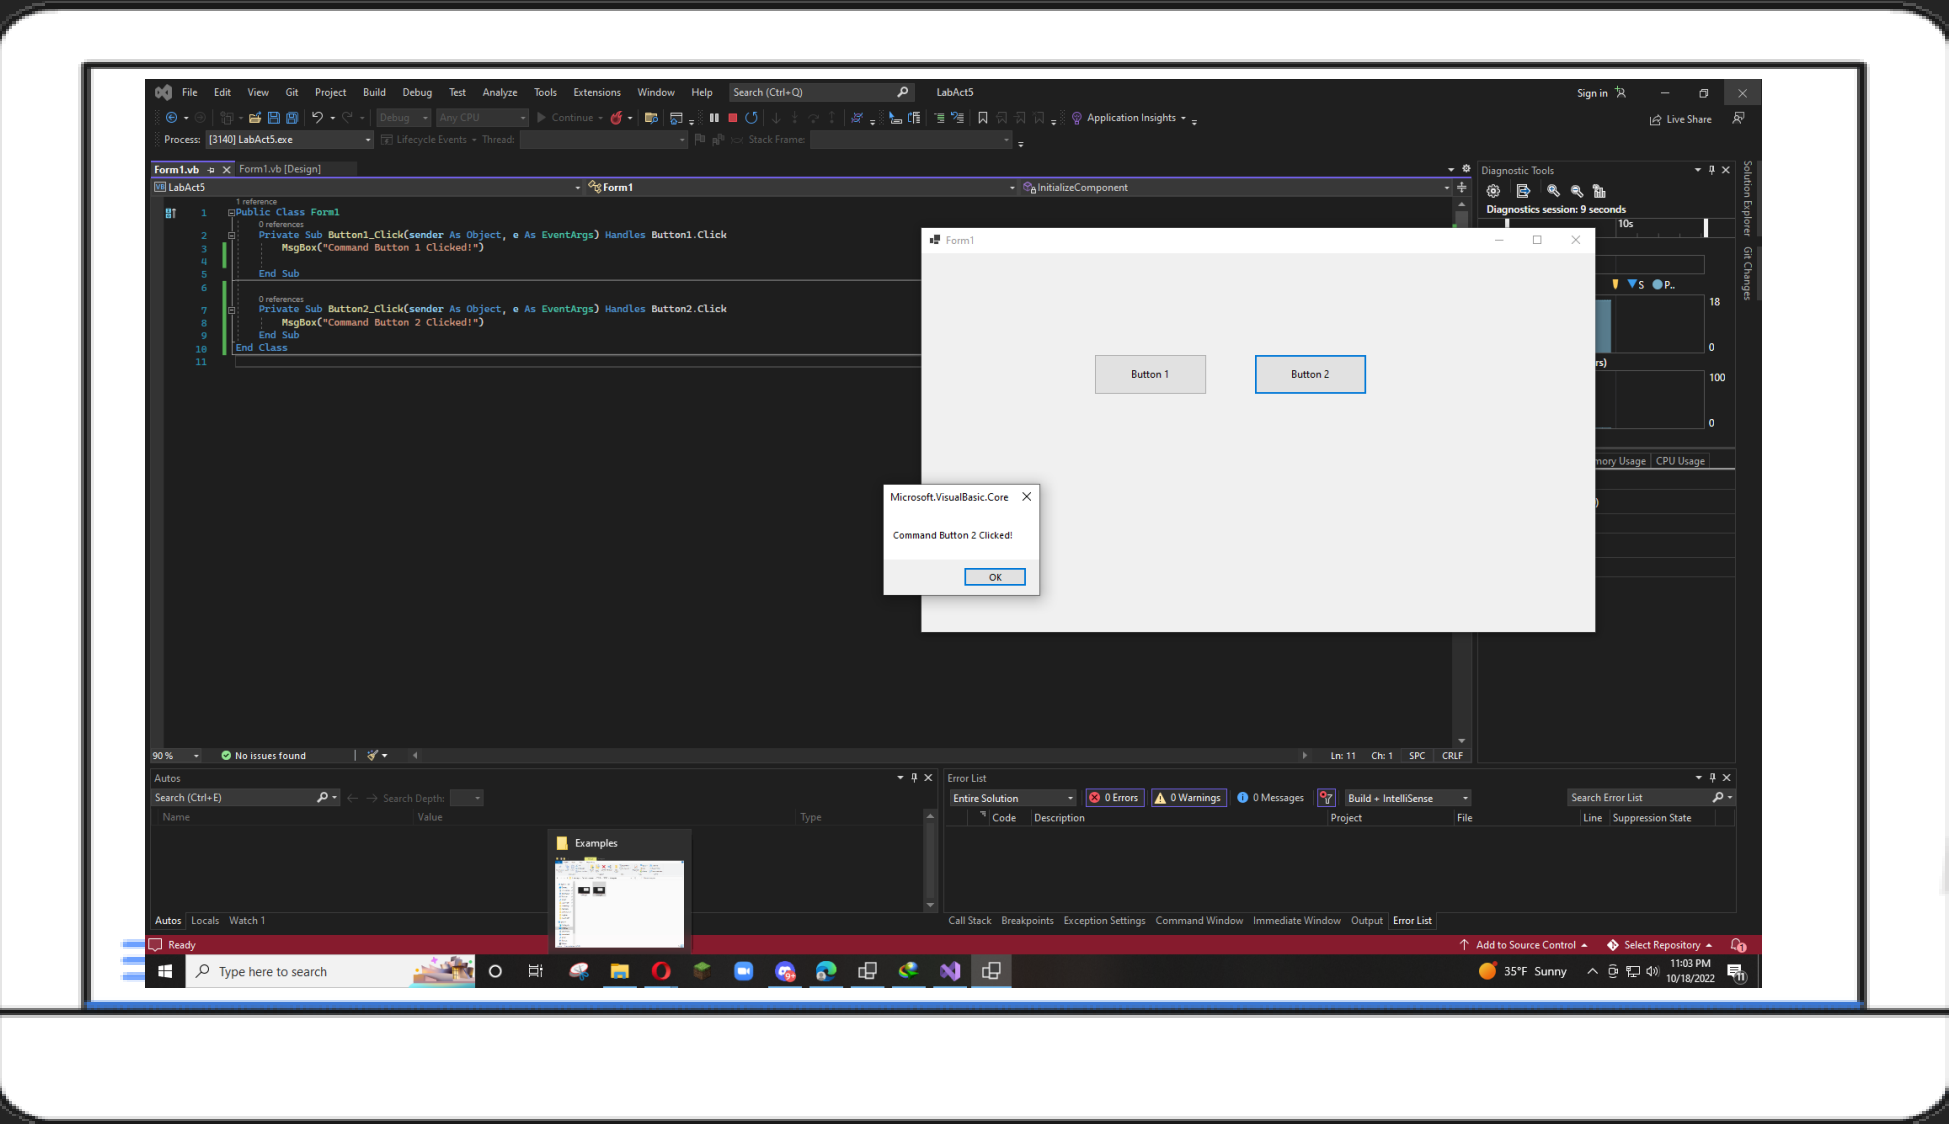

```vb
1 reference
Public Class Form1

    0 references
    Private Sub Button1_Click(sender As Object, e As EventArgs) Handles Button1.Click
        TextBox1.Text = "Yes, dogs are the man's bestfriend."

    End Sub

    0 references
    Private Sub TextBox1_TextChanged(sender As Object, e As EventArgs) Handles TextBox1.TextChanged

    End Sub

    0 references
    Private Sub TextBox2_TextChanged(sender As Object, e As EventArgs) Handles TextBox2.TextChanged

    End Sub

    0 references
    Private Sub Button2_Click(sender As Object, e As EventArgs) Handles Button2.Click
        TextBox2.Text = "Yes, cats are so cute."
    End Sub

End Class
```

Form1

Do you like dogs?

Yes, dogs are the man's bestfriend.

Do you like cats?

3. Design and develop an application system that when the user clicks the Command button 1, the message "Command button 1 clicked!" will be displayed at the Text box 1. When the user clicks the Command button 2, the message "Command button 2 clicked!" will be displayed at the Text box 2, and "Command button 3 clicked!" will be displayed at Text box 3 when the user clicks the Command button 3. Follow the given figure below in designing and developing the application system.

Parocha, John Mathew C.

ICT - 11

4. Design and develop an application system that when the user clicks the Command button with the caption "Submit", the message "Submit button 1 clicked!" will be displayed at the Message box . Follow the given figure below in designing and developing the application system.

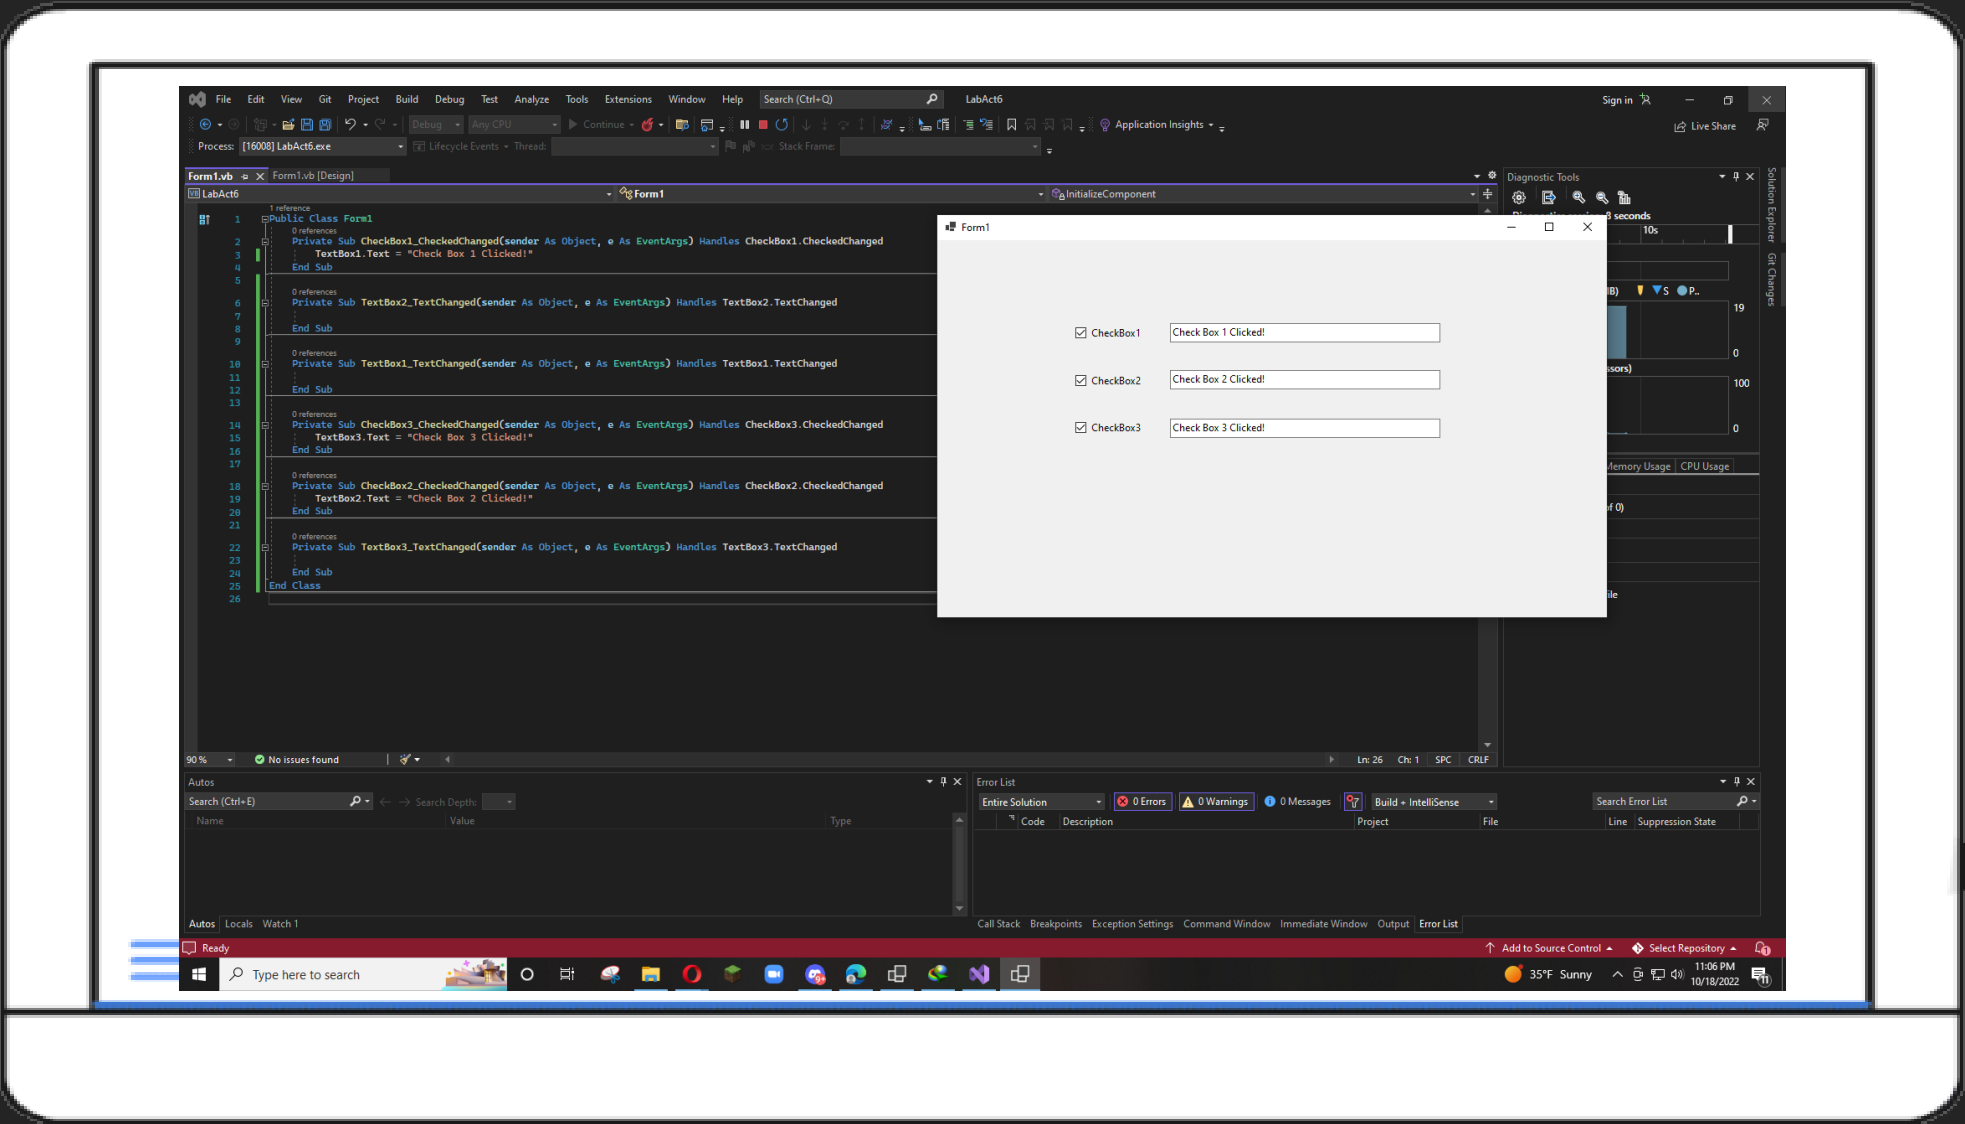

Parocha, John Mathew C.

ICT - 11

5. Design and develop an application system that when the user clicks the Command button 1, the message "Command button 1 clicked!" will be displayed at the Message box. When the user clicks the Command button 2, the message "Command button 2 clicked!" will be displayed at the Message box. Follow the given figure below in designing and developing the application system.

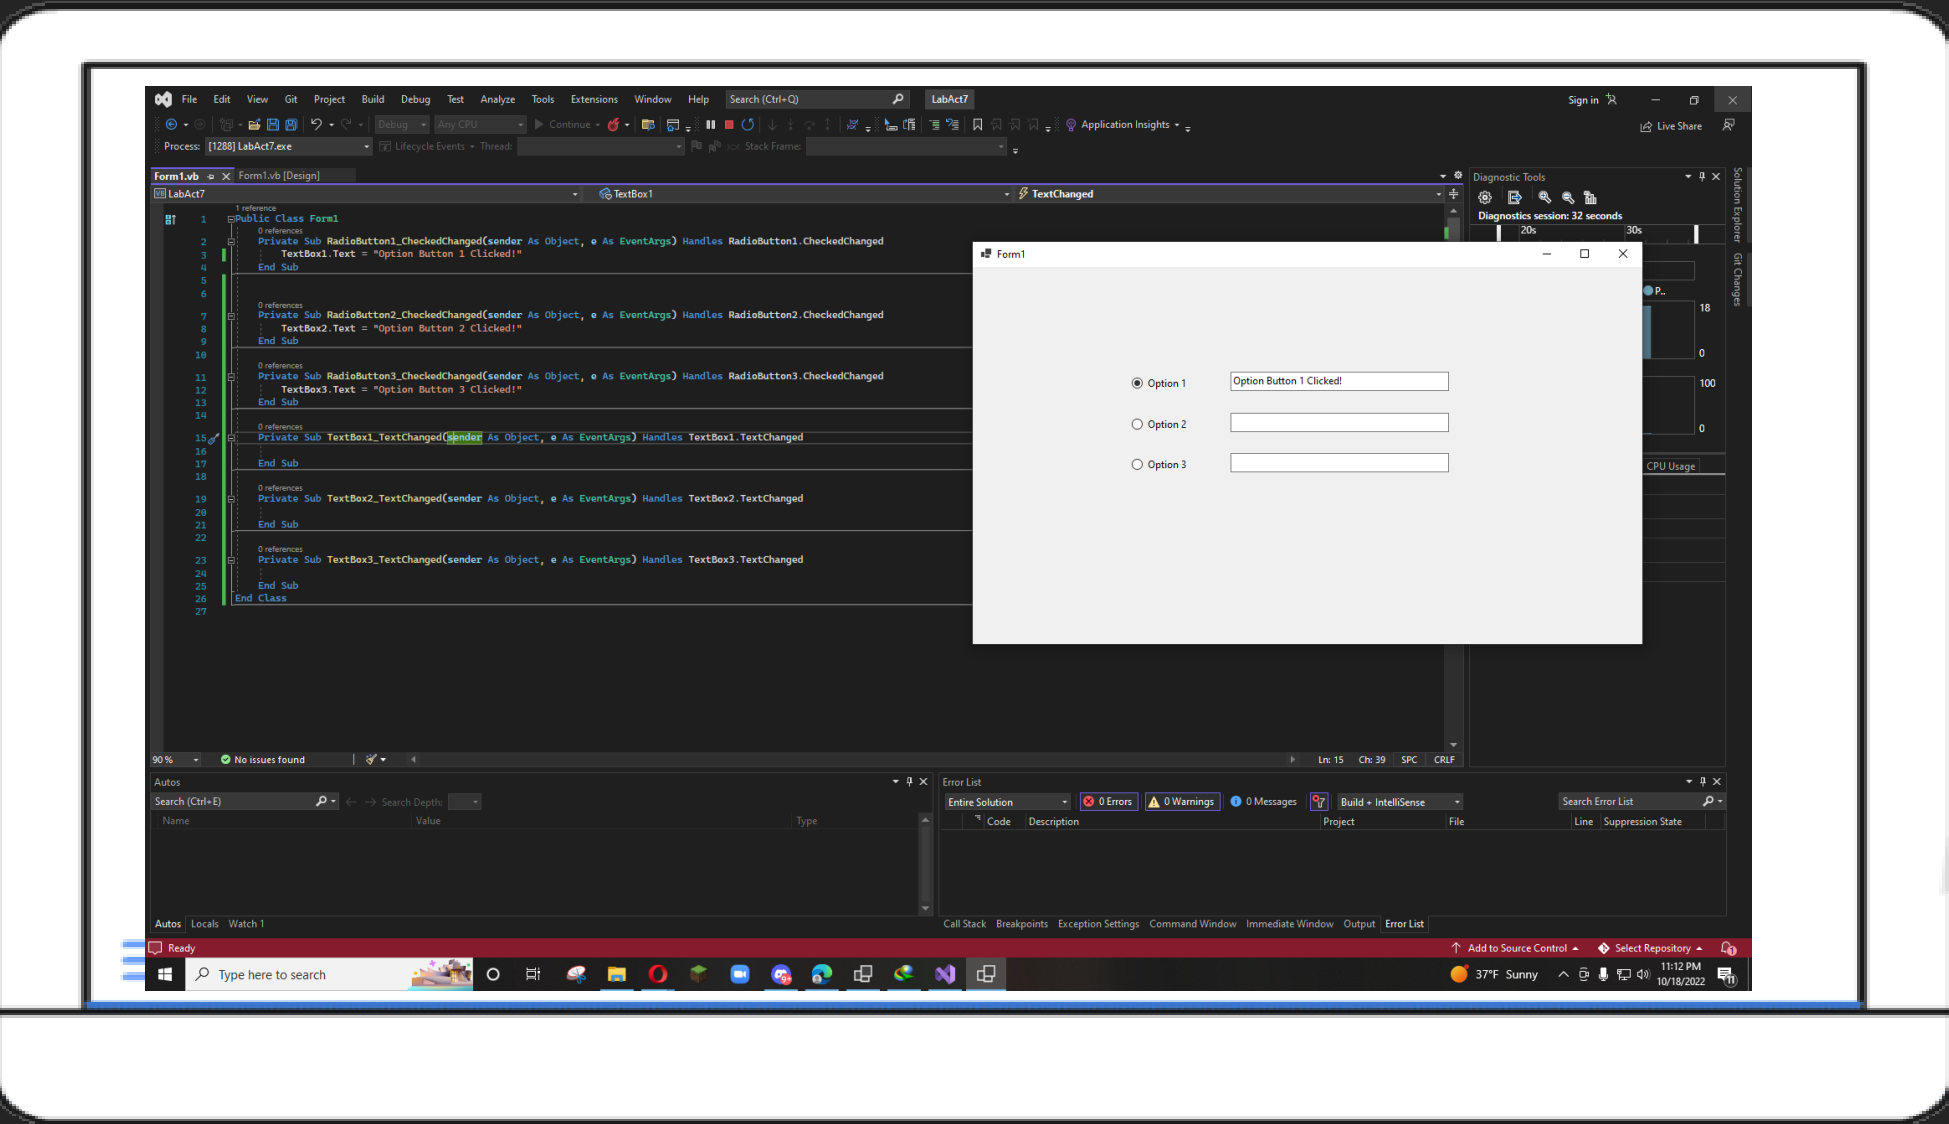

Parocha, John Mathew C.

ICT - 11

6. Design and develop an application system that when the user clicks the Check box 1, the message "Check box 1 clicked!" will be displayed at the Text box 1. When the user clicks the Check box 2, the message "Check box 2 clicked!" will be displayed at the Text box 2 and when the user clicks the Check box 3, the message "Check box 3 clicked!" will be displayed at the Text box 3. Follow the given figure below in designing and developing the application system.

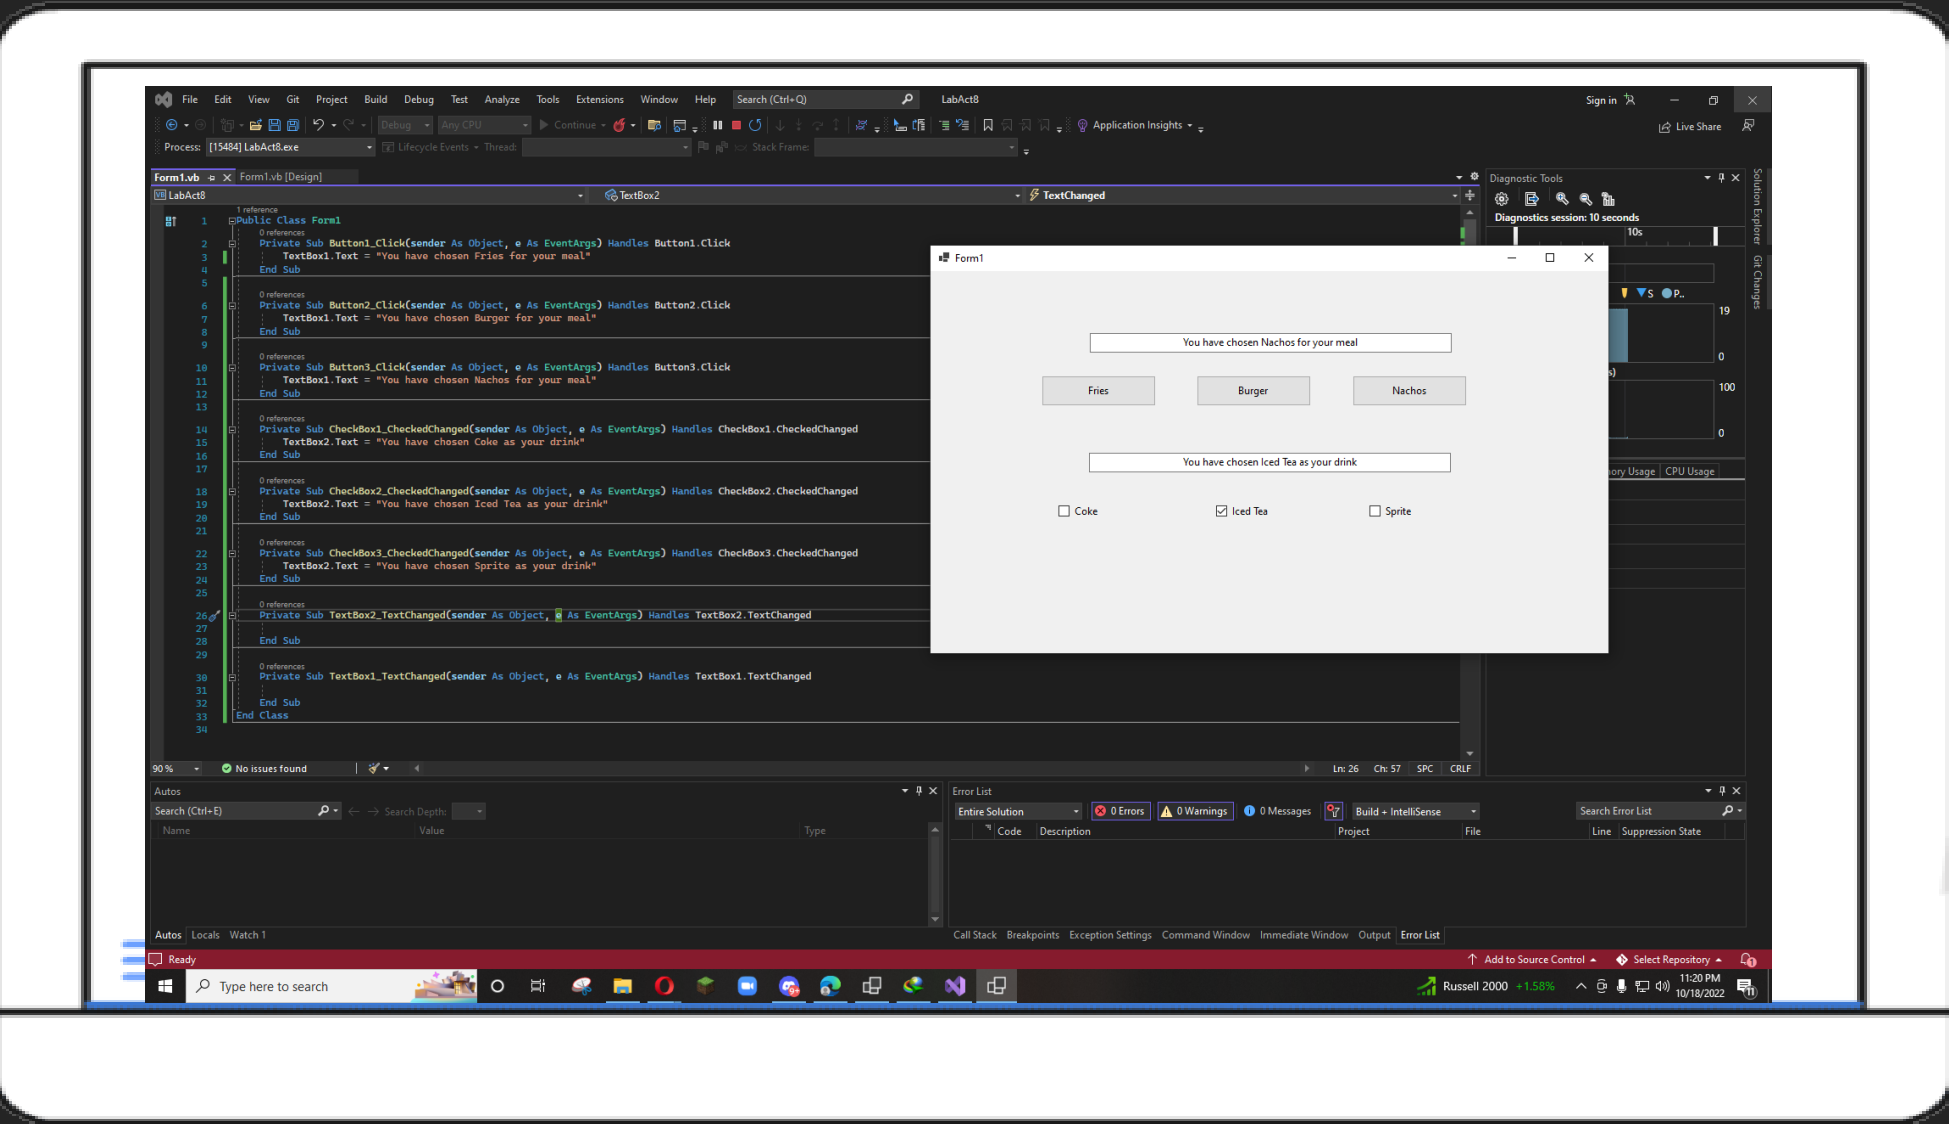

Parocha, John Mathew C.

ICT - 11

8. Design and develop an application system that when the user clicks the Option button 2, the message "Option button 2 clicked!" will be displayed at the text box 2. When the user clicks the Option button 1, the message "Option button 1 clicked!" will be displayed at the text box 1 and when the user clicks the Option button 3, the message "Option button 3 clicked!" will be displayed at the text box. Follow the given figure below in designing and developing the application system.

```vb
Public Class Form1
    Private Sub RadioButton1_CheckedChanged(sender As Object, e As EventArgs) Handles RadioButton1.CheckedChanged
        TextBox1.Text = "Option Button 1 Clicked!"
    End Sub

    Private Sub RadioButton2_CheckedChanged(sender As Object, e As EventArgs) Handles RadioButton2.CheckedChanged
        TextBox2.Text = "Option Button 2 Clicked!"
    End Sub

    Private Sub RadioButton3_CheckedChanged(sender As Object, e As EventArgs) Handles RadioButton3.CheckedChanged
        TextBox3.Text = "Option Button 3 Clicked!"
    End Sub

    Private Sub TextBox1_TextChanged(sender As Object, e As EventArgs) Handles TextBox1.TextChanged

    End Sub

    Private Sub TextBox2_TextChanged(sender As Object, e As EventArgs) Handles TextBox2.TextChanged

    End Sub

    Private Sub TextBox3_TextChanged(sender As Object, e As EventArgs) Handles TextBox3.TextChanged

    End Sub
End Class
```

ICT - 11

9. Design and develop an application system that when the user clicks the Command button 1, the message "Command button 1 clicked!" will be displayed at the text box 1. When the user clicks the Command button 2, the message "Command button 2 clicked!" will be displayed at the text box 1 and when the user clicks the Command button 3, the message "Command button 3 clicked!" will be displayed at the text box 1. When the user clicks the Check box 1, the message "Check box 1 clicked!" will be displayed at the text box 2. When the user clicks the Check box 2, the message "Check box 2 clicked!" will be displayed at text box 2, and when the user clicks the Check box 3, the message "Check box 3 clicked!" will be displayed at the text box 2. Follow the given figure below in designing and developing the application system.

Parocha, John Mathew C.

ICT - 11

10. Design and develop an application system that when the user clicks the Option 1, the message "Option button 1 clicked!" will be displayed at the text box 1. When the user clicks the Option button 2, the message "Option button 2 clicked!" will be displayed at the text box 1 and when the user clicks the Option3 Option 1 Option 2 Option 3 Option button 2 clicked! Buttoncheck1 Check 1 Check 2 Check 3 Command button 3 clicked! Button 1 Button 2 Button 3 Check box 2 clicked! 20 Option button 3, the message "Option button 3 clicked!" will be displayed at the text box 1. When the user clicks the Check box 2, the message "Check box 2 clicked!" is displayed at the text box 2. When the user clicks the Check box 1, the message "Check box 1 clicked!" will be displayed at the text box 2 and when the user clicks the Check box 3, the message "Check box 3 clicked!" will be displayed at the Text box 2. Follow the given figure below in designing and developing the application system.
